

Speaker Profile: Kasper Hettinga

Kasper Hettinga is a post-doctoral researcher at the Dairy Science and Technology group of Wageningen University. He is working in the field of proteomics.

Kasper Hettinga has a background in food technology, and is specialized in advanced chemical analytical methods as well as multivariate statistics. During his PhD, he has developed a new analytical method for mastitis pathogen detection, which is based on the detection of off-flavour molecules in milk samples.

In the first two weeks of April, Kasper Hettinga made a visit to New Zealand hosted by the Dairy Science and Technology group of AgResearch, Hamilton.
